## Product Selection Guide

www.smarthomebus.com

Dimmer to Change Light Level (intensity) $50 \%$ Up \& Down

## How to Calculate Your Load?

Depending on your Country Voltage, and According to your Fixture Voltage and Wattage as well as the Number of Fixtures, you can Calculate the Load

## Example:

if your Voltage is 220VAV, and you are Having One Bulb in Middle of Ceiling (that Bulb is 100 Watts as Example). Then your Load $=100 \mathrm{~W} / 220 \mathrm{~V}=0.46 \mathrm{Amp}$ if your Voltage is 110VAC, and you are Having One Bulb in Middle of Ceiling (that Bulb is 100Watts as Example). Then your Load $=100 \mathrm{~W} / 110 \mathrm{~V}=0.91 \mathrm{Amp}$ if your Voltage is 24VDC, and you are Having 4 Ceiling Spots (that LED Bulb is 3 Watts Each as Example). Then your Load $=4 \mathrm{X} 3 \mathrm{~W} / 24 \mathrm{~V}=0.5 \mathrm{Amp}$

## How To Select a Automation Module to Control your Light Fixtures?

There are many Lighting Types in the market, Different Types require Different Control Modules, Accordingly here is some recommendation:

## For Light Types that you like to Dim:

Examples: Chandler, Down light, Wall Light, Table Light, Standing Light, Spike Lights ++

| What to Select | Limits Instructions Recommendations | Max Wattage per Circuit Channel Fold 220V | Recommended Product | Model | How Many It Can Control | Products ( $\epsilon$ | Barcode |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Dimmer Module | Small Loads | 400 W | Trail Click -1D | SB-1D-TC | 1 Channel-2A | $\therefore$ |  |
| Dimmer Module | Small Loads | 200 W | Trail Click -2D | SB-2D-TC | 2 Channels 1A Each | B y |  |
| Dimmer Module | Small Loads | 200 W | 8Ch Dimmer | SB-DIM8c1A-DN | 8 Channels 1A Each |  |  |
| Dimmer Module | Normal Ch. Loads | 400 W | 6Ch Dimmer | SB-DIM6c2A-DN | 6 Channels 2A Each |  |  |
| Dimmer Module | Meduim Loads | 600 W | 4Ch Dimmer | SB-DIM4c3A-DN | 4 Channels 3A Each |  |  |
| Dimmer Module | High Loads | 1200 W | 2Ch Dimmer | SB-DIM2c6A -DN | 2 Channels 6A Each |  |  |
| Dimmer Module | Very High Loads | 2200 W | 1 Channel Dimmer | SB-DIM1c10A -DN | 1 Channel-10A |  |  |

For Ballast Driven Light Types That you Like to Dim:

|  |  |  |  |  | Note: <br> Ballast Must Be <br> Dimmable \& controllable <br> + Addressable Type |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\checkmark$ Flourecent | $\checkmark$ Ceiling Tiles | $\checkmark$ Neon Tubes | $\checkmark$ Metal Halide |  |  |

Examples: Ceiling Tile Lights, Cove Lights, Signage Lights , Tube Lights ++

| What to Select | Limits Instructions Recommendations | Max Wattage per Circuit Channel Fold 220V | Recommended Product | Model | How Many It Can Control | $\begin{aligned} & \text { Products } \\ & \text { C } \end{aligned}$ | Barcode |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Voltage Analogue Module | Very High Loads | Depends on Device Ballast Load | Trail Click -1D | SB-6B0-10V-DN | 6 Channel - 16A Max |  |  |
| DALI Bridge | Protocol Integration Only | Not Relative to our Controller | DALI Bridge | SB-DALI-DN | 64 Channels, Broadcast |  |  |

## For Colored and Multi Function Light Types:

Examples: Colored LED Lights, Decorative Lights, Colored Lights, Fiber Optics, Disco Lights, Building Lights, Garden and under Water Lights + +

| What to Select | Limits Instructions Recommendations | Max Wattage per Circuit Channel Fold 220V | Recommended Product | Model | How Many It Can Control | $\begin{aligned} & \text { Products } \\ & \text { C€ } \end{aligned}$ | Barcode |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| LED Driver | Normal Ch. Loads | 12 Watts for 12V Type 24 Watts for 24V Type | LED Dimmer | SB-4LED-DCV | 4 Channels 1A Each | $\therefore 1$ |  |
| DMX-Voltage Driver | High Loads | 48 Watts for 12V Type 96 Watts for 24V Type | DMX - LED Dimmer | OE-DMX4LED4-DCV | 4 Channels 4A Each |  |  |
| DMX Bridge | Protocol <br> Integration Only | Not Relative to our Controller | DMX Bridge | SB-DMX48-DN | 48 Channels |  |  |

Any Type of Light That Need only On/Off Control

| What to Select | Limits Instructions Recommendations | Max Wattage per Circuit Channel Fold 220V | Recommended Product | Model | How Many It Can Control | Products ( $\in$ | Barcode |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Relay Module | Small Loads | 500W | Trail Click Relay | SB-1R-TC | 1 Channels - Each 5A |  |  |
| Relay Module | Small Loads | 500W | Trail Click Relay | SB-2R-TC | 2 Channels - Each 5A | (e) |  |
| Relay Module | Small Loads | 500W | Trail Click Relay | SB-3R-TC | 3 Channels - Each 5A |  |  |
| Relay Module | Small Loads | 500W | Mini Relay | SB-2R-FL | 2 Channels - Each 5A |  |  |

Lighting Control

Any Type of Light That Need only On/Off Control

| What to Select | Limits Instructions Recommendations | Max Wattage per Circuit Channel Fold 220V | Recommended Product | Model | How Many It Can Control | Products ( $\in$ | Barcode |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Relay Module | Very High Loads | 5000W | DIN Module | Rlay 4c20A | 4 Channels - Each 20A |  |  |
| Relay Module | High Loads | 3500W | Mini Relay Module | Rlay 6c16A | 6 Channels - Each 16A |  |  |
| Relay Module | High Loads | 3500W | Mini Relay Module | Rlay8c16A | 8 Channels - Each 16A |  |  |
| Relay Module | Normal Loads | 2000W | Mini Relay Module | Rlay 12c10A | 12 Channels - Each 10A |  |  |

# $E_{\mathrm{c}}$ Climate Control 

## How to Calculate Your Load?

Depending on your Country Voltage, and According to your Fixture Voltage and Wattage as well as the Number of Fixtures, you can Calculate the Load

## Example:

if your Voltage is 220VAV, and you are Having One Bulb in Middle of Ceiling (that Bulb is 100Watts as Example). Then your Load = $100 \mathrm{~W} / 220 \mathrm{~V}=0.46 \mathrm{Amp}$ if your Voltage is 110VAC, and you are Having One Bulb in Middle of Ceiling (that Bulb is 100Watts as Example). Then your Load $=100 \mathrm{~W} / 110 \mathrm{~V}=0.91 \mathrm{Amp}$ if your Voltage is 24VDC, and you are Having 4 Ceiling Spots (that LED Bulb is 3 Watts Each as Example). Then your Load $=4 \mathrm{X} 3 \mathrm{~W} / 24 \mathrm{~V}=0.5 \mathrm{Amp}$

## How To Select a Automation Module to Control your Light Fixtures?

There are many Lighting Types in the market, Different Types require Different Control Modules, Accordingly here is some recommendation:
For Light Types that you like to Dim:

|  |  |  |  | Recommendation: <br> Add Flicker Supressor For LED Channels |  | Note: <br> Light Must Be Dimmable By Manual Dimmer |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\checkmark$ Incandescent | $\checkmark$ CFL | $\checkmark$ Halogens | $\checkmark$ Dimmable LED |  |  |  |

Examples: Chandler, Down light, Wall Light, Table Light, Standing Light, Spike Lights ++
